EXPERIENCE

Project Manager

Digital Data Solution Pvt Ltd Jan 2026 - Present

- Translate business requirements into product priorities, workflows and delivery plans for data-driven digital solutions.
- Coordinate stakeholders and structured feedback from problem definition through execution.

Founder

Handovr Jan 2026 - Present

- Shape a peer-to-peer used-phone marketplace around verification, pricing and safer handover workflows.
- Define product flows and prototype the system across buyer, seller and operational touchpoints.

AI & Automation Intern

Techpanion / NimbleS2P Jun 2024 - Jul 2024

- Supported AI-enabled workflow and automation initiatives for structured business processes.
- Applied extraction, retrieval and automation ideas to practical product workflows.

Product & Business Systems Intern

iCtrlBiz Consulting Aug 2023 - Dec 2023

- Mapped business requirements into CRM, lead-management and internal operating workflows.
- Worked across process understanding, system design and implementation support.

SELECTED WORK

Handovr

MARKETPLACE · PRODUCT STRATEGY

A verified used-phone marketplace focused on trust, pricing and a controlled buyer-seller handover journey.

CRM Pro

BUSINESS SYSTEMS · ANALYTICS

A sales operations system for pipeline management, reporting, quotas, forecasts and workflow visibility.

BizGuide AI

APPLIED AI · KNOWLEDGE RETRIEVAL

An AI product concept for grounded business guidance, specialized retrieval and clearer compliance workflows.

KarobarKit

BUSINESS SYSTEMS · OPERATIONS

An operations workspace for small businesses, bringing daily workflows and business information into one product.

FinAssist

FINTECH · INFORMATION ARCHITECTURE

A financial information workspace combining market data, calculators and everyday financial tools.

Invoice Intelligence

AUTOMATION · STRUCTURED DATA

An invoice-processing workflow that turns document inputs into structured data for accounts-payable operations.

HOW I WORK

Understand → Analyse → Prioritise

Design → Build → Measure

Start with the problem, use users and data to decide, then prototype quickly with technology and AI.

CORE SKILLS

Product

Product discovery · requirements · user flows · prioritisation · business analysis

Analytics

SQL · Python · KPI analysis · reporting · data visualisation · product measurement

Applied AI

LLM applications · RAG · prompt workflows · knowledge retrieval · automation

Technical

React · Next.js · FastAPI · Flask · PostgreSQL · Supabase · REST APIs · Git/GitHub

EDUCATION

Vellore Institute of Technology

B.Tech, Computer Science & Engineering (AI and ML)

Sep 2021 - Jul 2025

CERTIFICATIONS

- Python Programming - IIT Bombay
- C Programming - IIT Bombay
- Cisco Packet Tracer / Network Simulation - Cisco Networking Academy
- AI for All: From Basics to GenAI Practice - NVIDIA

POSITIONING

Product thinking · data analytics · AI-assisted product development

Open to product, analytics, AI-enabled product and business technology opportunities.
